Report No. 69  
98/12/10- 98/12/16

### Abstract

1. Display Advertising project
2. Reddit project
3. CTB project

### Description

#### 1. Display Advertising project

I did the parameter complexity analysis on my model.

I declared my base paper and main idea paper.

I had a meeting with Abbas. We talked about the way I have to read the papers. He asked me to Write the proposed method of my paper in English with all the details and then start to read two papers.

Now I know I have to write down three main things about every paper i read:

- What it does?
- Difference with my work?
- Why my work is better?

#### 2. Reddit project

I finished the BERT videos and also read a blog post about positional embedding.

Erfan was out of reach because of the loss of his grandfather. So the Dual GCN result has no progress since last week.

### Next Week

#### • Display Advertising project

Write the proposed method part of my paper.

Read two papers and write report about them.

#### • Reddit project

Get the result of the Dual GCN paper with help of Erfan.

#### • CTB project

Finish the app.
