

Abstract

1. Stochastic Processes TA work
2. Display Advertising project
3. AIC staff work

Description

1. **Stochastic Processes TA work**

I corrected quiz 7 and my part of midterm II exam. I also started to work on HW4.

2. **Display Advertising project**

I rewrote my seminars report and handed it to my judge professor. I also added the comparison between my proposed method and a baseline. (Implemented both of them in same conditions)

I reviewed my presentation slides and used some advice about its details.

3. **AIC staff work**

I implemented the DQN architecture but i need that some bugs be solved before finishing my part.

Next Week

• **AIC 2020 staff work**

Solve the problems and start training the DQN.

• **Display Advertising project**

Complete my presentations (Add animations / Write better notations about previous work)

Present the Seminar! (Monday)

• **Social and Economic Course work**

Write HW5. (Thursday)

• **Reddit project**

Meeting with Erfan Loghmani and get some information about his thesis.

Get back to the Reddit project
