

Abstract

1. SLT TA work
2. AIC 2020 staff work
3. Display Advertising project
4. Reddit project
5. Go to Tabriz

Description

- 1. SLT TA work**
I participated in TA meeting.
- 2. AIC 2020 staff work**
I worked on the code, But I couldn't handle the bugs in the client's code. I decided to exit working on it.
- 3. Display Advertising project**
I e-mailed Abbas to schedule a meeting but i didn't get a reply.
I signed up in the Data Days challenge which contains the data needed in this research project.
- 4. Reddit project**
We had a meeting with Sina and talked about my new idea.
We decided to implement Dual GCN (a GCN with two sets of weights for bipartite graphs) -> Erfan
Tweak number of layers of GCN to make sure it doesn't help. -> Sadegh
Read Gated Graph Neural Networks paper -> Me
Implement Hierarchical Bert model -> Sadegh
- 5. Go to Tabriz**
I traveled to Tabriz.

Next Week

- **Display Advertising project**
Arrange the weekly meeting with Abbas.
Extract the data and implement my idea and get results.
- **Reddit project**
Read the Gated Graph Sequence Neural Networks paper.
Have a meeting with Sina.
- **CTB project**
Get back to work on the code.

- **Go back to Tehran**
I'll go back to Tehran.
