

Abstract

1. Reddit project (Meeting with Hamid - Continue Reading about GCN - Think about an idea of combining our algorithm with GCN family)
2. Display Advertising project (Read more papers)
3. SP course TA work (Quiz 6 and its solution)

Description

1. **Reddit project (Meeting with Hamid - Continue Reading about GCN - Think about an idea of combining our algorithm with GCN family)**  
We continued reading about GCN literature. Also i got a new idea to extend GCN with more FC layers between neighbor averaging layers.
2. **Display Advertising project (Read more papers)**  
I'm working on chapter two o my thesis. Other tasks have made this process long and annoying but i think this week i will break its curse. I'm also thinking about how to find more papers and read them.  
I will have a meeting with Abbas the week and i should report the progress.
3. **SP course TA work (Quiz 6 and its solution)**  
I defined a question for quiz 6 of SP course and its solution.

Next Week

- Reddit project (Continue Reading about GCN - Think about an idea of combining our algorithm with GCN family)
- Display Advertising project (Read more papers - finish the chapter two previous works)
- SP course TA work (Prepare for TA class - TA class - Quiz 7 and its solution)
