

Abstract

1. Display Advertising project
2. Reddit project

Description

1. **Display Advertising project**

I uploaded the data to the cloud.

I started working on FM library called fastFM. The data isn't ready for it yet.

I figured out there was a small problem with the data I produced. some thousands of data points at the end of the dataset were blank due to a file writing problem. For now I will remove those data points and re-run the simulations. Maybe later I tried recovering them.

2. **Reddit project**

We are still waiting for Hamid to send us information about new recruit.

We hadn't a meeting this week.

Next Week

• **Display Advertising project**

Fix the problem with dataset.

Transform the dataset into COOMatrix format.

Run a simulation on FastFM library.

Re-run the simulations for my proposed method with fixed data.

• **Reddit project**

Have meeting with Hamid about new recruits and decide the target conference.

Start research loop with help of Sadegh (Read papers -> Get idea -> Modify idea to fit our work -> Implement -> Analyze the result and find the weaknesses -> Read more papers...)
