

## Abstract

1. SLT TA work
2. Reddit project

## Description

### 1. Display Advertising project

I had a meeting with Abbas.

I worked on my code to join and unify the data from multiple files. It's not finished yet.

### 2. Reddit project

I presented our previous work on Reddit project in the Lab meeting. I also asked for new recruitment to fill in the Erfans place.

We had a meeting, (Only me and Sadegh). We discussed SAG-Pool and GAT methods. We thought about a new idea about utilizing GAT type attention on a Bipartite GNN, but not yet implemented it.

## Next Week

### • SLT TA work

Define some questions for final exam.

### • Display Advertising project

Finish the data code.

Start applying my model on those datasets.

Start gathering competing papers implementations to compare their results.

### • Reddit project

Apply class weighting to current models and get result.

Work on adding GAT to the BGNN models.

Ask Hamid for a new member.
