Report No. 116
99/11/04- 99/11/10

Abstract

- 1. Display Advertising project

Description

1. Display Advertising project

- I tried to find another FM implementation and run it. I found two and both of them failed to work correctly due to memory allocation problems.
- I tried to run xDeepFM on all datasets (OutBrain87M, CriteoCat-4, CriteoCat-5, CriteoCat-6). The xDeepFM implementation is somehow problematic and has deep problems. I couldn't make it work.
- I worked on thesis.
- I presented my thesis in DML meeting. I worked on the comments. I'm still waiting for Hamid's comments in the presentation.

Next Week

- **Display Advertising project**
 - Finish FM tests and gather their results to the final table.
 - Finish chapter two of my thesis.
 - Start working on chapter three of my thesis.
