

Abstract

1. Reddit project (Start Reading about GCN literature - Think about combining our algorithm with GCN family)
2. Display Advertising project (Meeting with Pegah Co. - Finish datasets section of chapter two of my thesis)
3. SP course TA work (Midterm exam supervision - Quiz 3 correction)

Description

1. **Reddit project (Start Reading about GCN literature - Think about combining our algorithm with GCN family)**
We started to read about GCN literature more specifically. It seems we have missed a lot of papers.
Also i thought about combining our algorithm with GCN and still there's not any idea.
We wanted to have a meeting with Hamid but we couldn't establish a meeting yet.
2. **Display Advertising project (Write datasets chapter of my thesis)**
I finished datasets section of second chapter of my thesis. I had a meeting with Abbas and i should finish the whole chapter two by two weeks from now. I'm also thinking about how to find more papers and read them.

Next Week

- Reddit project (Meeting with Hamid - Continue Reading about GCN - Think about an idea of combining our algorithm with GCN family)
- Display Advertising project (Read more papers - write the chapter two previous works)
- SP course TA work (Quizzes and their solutions)
