

Abstract

1. Read the literature and prepare for lecture
2. Discuss about new ideas

Description

1. **Read the literature and prepare for lecture**

We (me and Armin Behnamnia) started to read about literature of "Interpretable Learning" and prepared to present it in next weekly meeting of the lab. These readings contains the references which Dr. Rabiee sent me as an email. [?]

2. **Discuss about new ideas**

We (me and Armin Behnamnia and Dr. Rebiee) had a Meeting in the lab for discussing about new ideas to work on as M.Sc project and i presented my main ideas which were about "Designing a supervised AutoEncoder to divide input into class and style data" and "Using AutoEncoders as a data measurement tool inside the NeuralNetworks and how to utilize it".

Next Week

- Lecture about Interpretable Learning (Weekly meeting)
- Search for keywords about AutoEncoder concept and find important papers.
