Report No. 49

98/07/20- 98/07/26

Abstract

1. Reddit project (Matching current algorithm with GCN framework)
2. Display Advertising project (Meeting with Pegah Co - Edit and rewrite thesis)

Description

1. **Reddit project (Matching current algorithm with GCN framework)**
   I read about GCN and found the similarities and differences of our current algorithm with GCN framework. I also got an idea about Boosting our current model but Sina said it's better to move on and don't waste our time on fine tuning the model.

2. **Display Advertising project (Meeting with Pegah Co - Edit and rewrite thesis)**
   I had a meeting with Abbas again. He told me to change the structure of second chapter of my thesis. I read some papers briefly and worked on the second chapter. It's not finished yet.

Next Week

- Reddit project (Meeting with Kevin, Sina and Hamid - Testing proportion scenarios - Checking the gathered data for Location and Age - Think about Boosting idea - Read more about GCN and work on the implementation)

- Display Advertising project (Meeting with Pegah Co - Edit and rewrite thesis - Read some more papers)

- SP course TA work (Quizzes and solutions for homework)
