## Abstract

1. Reddit project (Meeting with Hamid - Continue Reading about GCN - Think about an idea of combining our algorithm with GCN family)
2. Display Advertising project (Read more papers - Rewriting chapter two of my thesis)
3. SP course TA work (TA Class - Correcting quiz 6)

## Description

1. **Reddit project (Meeting with Hamid - Continue Reading about GCN - Think about an idea of combining our algorithm with GCN family)**
   We continued reading about GCN literature. Also i got a new idea to extend GCN with more FC layers between neighbor averaging layers but it didn't perform well on a citation graph dataset.

2. **Display Advertising project (Read more papers - Rewriting chapter two of my thesis)**
   I'm working on chapter two o my thesis. Other tasks have made this process long and annoying but i think this week i will break its curse. I'm also thinking about how to find more papers and read them.

   I will have a meeting with Abbas the week and i should report the progress.

3. **SP course TA work (TA class - Correcting quiz 6)**
   I got ready for TA class and solved some examples for the students. I also corrected my part of quiz 6.

## Next Week

- Reddit project (Continue Reading about GCN - Think about an idea of combining our algorithm with GCN family - Have meeting with Kevin and Sina)

- Display Advertising project (Read more papers - finish the chapter two previous works)

- SP course TA work (Prepare for TA class - TA class - Quiz 7 and its solution)
