Report No. 103

99/08/03- 99/08/09

Abstract

1. Display Advertising project
2. COVID

Description

1. **Display Advertising project**

   I continued running the simulations. I haven't found the main source of overfitting int criteo dataset yet.

2. **COVID**

   I'm fully recovered from COVID19 and it won't affect my progress anymore.

Next Week

- **Display Advertising project**

  Wait for the server to finish the overfitting investigation experiments.

  Start another experiment to determine the effect of number of highly branched features on model performance (and generalization).

  Search for recently published papers and start to read related ones.
