Report No. 106

99/08/24- 99/08/30

Abstract

1. Display Advertising project

Description

1. **Display Advertising project**

   I finished the interaction networks l2-regularization experiment. The results show that this regularization doesn't help too. (As well as the embedding parameters regularization)

   I started to experiment the l2-regularization over head network parameters. It's still running.

Next Week

- **Display Advertising project**

  I'll continue running L2-Reg experiments and also applying dropout over all parts of the model (Embeddings, interaction Networks and Head Network).
